

Quality Policy

..... modern and professional salvage agents and parts recyclers

Established for over 30 years, ASM Auto Recycling is widely regarded as one of the UK's most modern and professional vehicle salvage agents and parts recyclers.

At present we process over 30,000 end-of-life vehicles every year and specialise in online salvage auctions, with over 2,500 damage-repairable and stolen-recovered cars, vans and bikes available for purchase every single week.

We also boast an extensive used car spares department. With over 1,000 vehicles stored at our premises for vehicle dismantling, we can supply used car parts for most makes & models in the UK.

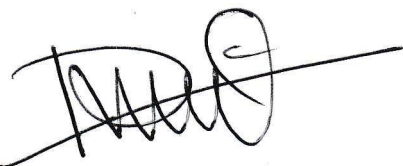

Certification to the internationally recognised standard for Quality Management (ISO9001:2015) is central to the way that the company conducts its business.

Company core values and objectives are:

- Offer a quality service with a professional approach and a rapid response
- Treat all people fairly with patience and understanding
- Provide expert technical support
- Maintain a large stock of car parts that meet customer requirements
- Provide accurate and clear information of salvaged vehicles for sale

Quality objectives are defined and monitored within the company and are regularly reviewed to identify opportunities for continual improvement.

We will work to continually improve the company performance and its associated management system to satisfy the requirements and expectations of our clients. The systems defined have my active full support. They are under continual review and improvement, however once defined, are then mandatory for all personnel.

Paul McDonagh
