

Quality Policy

..... modern and professional vehicle salvage agents and parts recyclers

Established for over 30 years, ASM Auto Recycling Ltd is widely regarded as one of the UK's most modern and professional vehicle salvage agents and parts recyclers.

At present we process over 30,000 end-of-life vehicles every year and specialise in online salvage auctions, with over 2,500 damage-repairable and stolen-recovered cars, vans and bikes available for purchase every week.

We also have an extensive used car parts department. With over 1,500 vehicles stored at our premises for vehicle dismantling, we can supply recycled car parts for most makes and models of vehicles to anywhere in the UK and across the world.

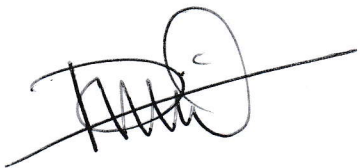

Certification to the internationally recognised standard for Quality Management (ISO9001:2015) is central to the way that the company does business.

Company core values and objectives are:

- Offer a quality service with a professional approach and a rapid response
- Treat all people fairly, with patience and understanding
- Provide expert technical support
- Provide accurate and clear information of the salvage vehicles available for sale
- Maintain a large stock of recycled car parts that meet customer requirements

Quality objectives are defined and monitored within the company and regularly reviewed to identify opportunities for continual improvement.

We will work to continually improve the company's performance and associated management systems in order to satisfy the requirements of our clients. The systems defined have my active full support. They are under continual review and improvement, however once defined, are mandatory for all personnel.
